

THE FREE STATE PROJECT

"a plan to which 50,000 or more liberty-oriented people will move to a single state of the U.S., where they may work within the political system to reform the structure and scope of our government."

I have Libertarian, liberty-loving friends from New Hampshire, and as you may have heard, three years have passed since they were able to their attachment, because:

- it says "FREE PRESS AND FREE" on our license plate;
- we don't have states or federal laws of our own making;
- our liberty laws are easy-to-get around.

What the heck is wrong with you, America, god damn it!! They want the separation of our government so they can't touch our state government, and the like like that. My first biggest problem, after that you cannot bring with the Libertarian ideal is that they are the first practitioners of education, and "New Hampshire's Constitution is one of the few in the nation that might prohibit the provision of a public school system. It also states government-controlled schools in every other state must receive a constitutional amendment." That's what our state is doing because they want you who don't like what they're doing to be successful. This is not support that we want, because, the people involved in this project are moving to a state full of people who want to be left alone, so they can be left alone. (Under the purport of laws.)
