Animal Mukti is a landmark clinic  
 founded and fully funded by  
 Jivamukti Yoga Center  
 which provides free spay and neuter  
 services to cats and dogs in  
 New York City.

## Who We Are:

As caring, compassionate citizens we believe that our community has a moral and ethical responsibility to address the problems associated with uncontrolled breeding of cats and dogs. The Animal Mukti Free Spay and Neuter Clinic is dedicated to ending the suffering of city cats and dogs caused by uncontrolled breeding. Since 1999, through the efforts of Sharon Gannon and David Life of Jivamukti Yoga and Janet Rienstra of Meta Records, Animal Mukti has been an integral part in preventing the senseless deaths of unwanted dogs and cats in New York City through its landmark clinic by providing:

- Spaying and neutering to thousands of cats and dogs, at no cost to owners.
- Additional medication or medical attention needed prior to and post surgery.

Anyone can call (212) 752 - 4840 and make an appointment for a physical exam and a free spay or neuter with the hospital, located at 306 East 59th Street.

The success of Animal Mukti has meant that more city cats and dogs have lived and will continue to live longer, healthier, HAPPIER lives. Thank you for contributing to our cause!

## Animal Mukti Success Metrics

- Since its inception, Animal Mukti has already seen the number of companion animals who were to be euthanized declined by 35 percent!
- Thousands of dogs and cats that would otherwise have contributed to pet overpopulation have been neutered, at no cost to owners.

With over 600,000 homeless cats in New York City alone, Animal Mukti is proud to contribute to the decline of euthanizations through the free spay and neuter program.

## Lokah Samasta

## Sukhino Bhavantu

*"May all beings everywhere  
be happy and free"*

## Did You Know?

- The U.S. spends over \$600 million every year destroying "man's best friend." A mere fraction of this amount raised through Animal Mukti will contribute to the LIVES of the animals, not to their DEATHS.
- In seven years, one female cat and her offspring can theoretically produce 420,000 cats.
- In six years, one female dog and her offspring can theoretically produce 67,000 dogs.
- Spaying eliminates the possibility of uterine or ovarian cancer and greatly reduces the incidence of breast cancer particularly when your pet is spayed before her first estrous cycle.
- Neutering eliminates testicular cancer and decreases the incidence of prostate disease.
