

Grant Opportunities & News You Can Use

Hello, faculty,

We are back with our January Grant Opportunities newsletter! We have a few announcements, so let’s jump in.

First, some peer institutions will be hosting a roundtable with NSF program officers to discuss Mid-Career Awards, specifically for faculty applying from Primarily Undergraduate Institutions. Faculty are invited. The meeting will take place at 3PM on Thursday, February 2nd. Register here:

https://grinnellcollege.zoom.us/webinar/register/WN_ASj7Gek5SI2YLPkP9w4o5g

As always, we will be hosting virtual office hours at 10 A.M on the first Friday of the month. Our next session will be **Friday, February 3, 2023 at 10 A.M.** You can join us via zoom here:

Join Zoom Meeting <https://columbiauniversity.zoom.us/j/98766935924?pwd=VEdsdGN1NFBsNTNJQ1h1VkJhdXkiZz09>

Meeting ID: 987 6693 5924 Passcode: 493168

Our March office hours will be in person! On Friday, March 3 at 10 AM, please join us at Barnard Hall 406.

This month we have a [Featured Funder](#) column featuring research funding from the National Endowment for the Arts. For [Sage Advice](#), we have a column on why you should consider being a reviewer for the NSF. For [The History of American Philanthropy](#), we are continuing the story of the Russell Sage Foundation, looking at the crucial role played by his second wife, Olivia Slocum Sage.

We have [news stories](#) and brief thumbnails of opportunities coming due in January. And in the back, we have six months’ worth of deadlines. (As always, check the website! Some of the later deadlines have not yet been released.) The next [internal grant deadline](#) for 2022-2023 is March 3, 2023 for Presidential Research Awards, Gildersleeve Proposals, and Faculty Research Grants.

That’s it for us! Don’t hesitate to reach out if you’re in need of funding, someone to review your applications, help building a budget, advice on managing a grant, or just want to chat. We’re here to help!

National Endowment for the Arts—Not Just for Artists

We have profiled the NEA before [in a 2018 edition of this newsletter](#), but I wanted to focus today on opportunities at the NEA specifically available for scholars, not artists. But first, some history!

The NEA was started in 1965 with the goal of “supporting excellence in the arts, both new and established; bringing the arts to all Americans; and providing leadership in arts education.” It was established through a bill signed by Lyndon Johnson as part of his Great Society plan. (Amusingly, [the Wikipedia article on the NEA](#) doesn’t note anything else about the bill or Johnson except, “According to historian Karen Patricia Heath, ‘Johnson personally was not much interested in the acquisition of knowledge, cultural or otherwise, for its own sake, nor did he have time for art appreciation or meeting with artists.’” Burn.)

Johnson’s putative indifference to the arts aside, the NEA was both relatively productive and well-funded in its early years, receiving in the 1980s between \$160-180 million annually. Yet the 1980s also marked the beginning of regular attacks on the NEA, particularly by conservative cultural commenters who believed the agency had strayed from its mission and was funding offensive and/or low-quality works. When Ronald Reagan took office, he established a taskforce to investigate the NEA and NEH with an eye toward abolishing the NEA within three years. However, the taskforce found that both agencies were well-run and provided much needed support to its grantees, so the NEA stayed.

Oponents continued to look for reasons to defund the NEA, though, and in 1989 began a media campaign against the NEA focused on two particularly controversial artworks: [“Piss Christ,”](#) a photo by Andre Serrano that depicted a plastic crucifix submerged in the artist’s urine, and an exhibition by the photographer [Robert Mapplethorpe](#) that featured homoerotic and nude portraits. The controversy around those artworks, followed a year later by a similar outcry over [four performance artists](#), led to Congress cutting NEA’s funding nearly in half and the agency deciding to stop supporting individual artists and focus their attention on organizations.

Today the NEA still funds arts organizations, (including the Athena Film Festival!), but I want to draw your attention to two sources of funding for scholarly work.

[“Research Grants in the Arts](#) funds research studies that investigate the value and/or impact of the arts, either as individual components of the U.S. arts ecology or as they interact with each other and/or with other domains of American life. Matching/cost share grants of \$20,000 to \$100,000 will be awarded...Projects supported under this program *must* include data analysis activities that occur during the period of performance, and can include either primary and/or secondary/archival data sources. We do not fund projects that focus *exclusively* on data acquisition.” **Deadline: March 27, 2023.**

[“NEA Research Labs](#) funds transdisciplinary research teams grounded in the social and behavioral sciences, yielding empirical insights about the arts for the benefit of arts and non-arts sectors alike. Through this program, we are cultivating transdisciplinary research partnerships that are producing research findings and evidence-based tools of value not only to arts practitioners, but also to non-arts sectors such as healthcare, education, and business or management. Institutions of higher education and/or nonprofit research and policy organizations may submit applications to be NEA Research Labs. The NEA Research Labs program offers grant funding for longer-term research agendas. These agendas will include multiple research studies and activities that build and inform the field throughout the life of an NEA Research Lab. Matching/cost share grants of \$100,000 to \$150,000 will be awarded.” **Deadline: March 27, 2023.**

Sage Advice

Why You Should Volunteer to Serve As An NSF Reviewer

A few months ago, I attended a conference (along with the illustrious Mark Godwin) and we heard from a faculty member at another college who had been tapped to serve a two-year term as a Program Officer at the NSF. When the Q&A came around, someone asked the obvious question: How did you end up getting that gig?

The answer, it turned out, was that she had served as a reviewer on an NSF panel and someone in the NSF recommended her for the job. That sort of thing doesn't happen terribly often, but it's an interesting illustration of why you might want to consider serving on a review panel. [The NSF has a longer article on that topic](#), which seems worth sharing. Here are some highlights.

“Reviewers are Essential - NSF needs YOU

- “To implement peer review, NSF depends upon the reviewer community for nearly 240,000 reviews per year. We try to limit the number of requests made to any single individual, recognizing the many demands our reviewers have on their time. Therefore, NSF strives to increase both the size and diversity of the pool of reviewers to ensure that the NSF merit review process benefits by receiving broad input from a variety of different perspectives. You can help by volunteering to review proposals in your area of expertise.”

“Benefits to You as a Reviewer

- “In addition to providing a great service to NSF and the science and engineering community, reviewers benefit from reviewing and serving on panels. For example, reviewers gain first hand knowledge of the peer review process; learn about common problems with proposals; discover strategies to write strong proposals; and, through serving on a panel, meet colleagues and NSF program officers managing programs related to your interests.”

“How to Become a Reviewer

- “To become an NSF reviewer, send an e-mail to the NSF program officer(s) of the program(s) that fits your expertise. Introduce yourself and identify your areas of expertise, and let them know that you are interested in becoming a peer reviewer. It is most helpful if you also attach a 2-page CV with current contact information. We also encourage you to share this request with other colleagues who might be interested in serving as NSF reviewers. NSF welcomes qualified reviewers from the academic, industrial, and government sectors.

“If you are selected as a reviewer, NSF will ask you to provide some demographic information on a voluntary basis¹. Although submission of demographic information by reviewers is voluntary-and there are no adverse consequences if it is not provided-reviewers are strongly encouraged to provide this information to NSF. These data are used in the design, implementation, and monitoring of NSF efforts to increase the participation of various groups in science and engineering.”

Contact NSF Now

- “Please take a few minutes now to contact NSF. If you need to find the appropriate NSF Program Officer to contact, just go to the NSF Website: www.nsf.gov. Select the Quick Links tab at the top of the home page. This will take you to the selected home page. The "Contact US" column provides contact information for Program Officers and the programs they manage.”

The History of American Philanthropy

[Last issue](#), we talked about the life of Russell Sage, the Gilded Age tycoon notorious for his stinginess, shady business practices, and titanic wealth. But the story of the Russell Sage Foundation really only began with Russell Sage's death in 1906, when his wife, Margaret Olivia Sage, inherited his fortune.

Margaret Olivia Sage was born in 1828 in Syracuse, New York. Her father, Joseph Slocum, was a former New York State Assemblyman and, for a while, a prosperous merchant, businessman, and inventor of agricultural machinery. Olivia, as she preferred to be called, spent her early years living in a mansion as one of the most prosperous families in Troy. Then, when Olivia was nine, the Panic of 1837 struck.

[The Panic of 1837](#) bloomed from a mixture of causes and has been alternately blamed on land speculation in the West, plunging cotton prices in the South, and a gradual tightening of foreign credit, especially from Britain, in response to the regular American failure to pay back its debts. (Sound familiar? Playing middleman between Britain and the U.S. is partially how George Peabody made his fortune.) Above everything else, though, the Panic of 1837 was an old-fashioned bank run. Andrew Jackson had refused to extend the charter of [the Second Bank of the United States](#), and banks in New York soon ran out of gold and silver to back its currency. The depression that followed was brutal. Wages crashed across the country, unemployment rose, and nearly half of all banks closed.

Slocum's father was one of the many people who lost nearly everything in the crash. He spent his life trying to rebuild his fortune through various, largely unsuccessful business dealings. One such business deal was with Russell Sage. Slocum went into business with Sage and another man, Wheeler. In the course of their business dealings, they came to acquire the debt of a man named Alanson Sweet in Milwaukee. Sweet's debt was secured by mortgage on a warehouse and the trio—Sage, Slocum, and Wheeler—agreed that they should get possession of the deed to the warehouse, preferably at artificially low rate, and split its value, which Sage claimed was approximately \$24,000 after the debts were cleared. Sage handled the affair and told his partners they would need to pay \$10,000 to a fourth person named Alexander Mitchell to smooth the way. They paid the funds and in the end, Sage handed over \$16,000 to his partners, claiming it was the best that could be done. They accepted and only later found out that Sage had made a secret deal to sell the warehouse to Mitchell for \$105,000, and to keep one-third of the value of the warehouse for himself. This somewhat complicated case eventually [went to court](#) and dragged out until 1863. The courts found that Sage had misled his partners, but that the scheme to acquire the mortgage at an artificially low rate was itself illegal and therefore it was against the interest of the court to help Slocum and Wheeler acquire their share of the profit.

The Slocum family fortunes never really recovered. Olivia was educated at the Troy Female Seminary, with support from a wealthy uncle, and spent the next twenty-odd years supporting herself as a teacher. Then, in 1837, Russell Sage's much-loved wife, Marie-Henrie Winne, died of stomach cancer. It's not entirely clear how or why Olivia Slocum and Russell Sage met. There's some speculation that it might have been through Marie-Henrie, who had also been educated at Troy Female Seminary. Whatever the introduction, Olivia Slocum did send Russell Sage a condolence note. He replied, a correspondence began, and a year later, in 1868, they were married. She was 41 and he was 53.

The [common story you hear](#) is that it wasn't a terribly happy marriage; [Olivia reportedly struggled with her husband's frugality](#) and donated his fortune to causes after his death that would have annoyed him during life. An early biographer, Paul Sarnoff, claimed that Olivia Sage's personal physician told him that the marriage was never consummated and that Olivia was bitterly jealous of Russell Sage's first wife ([cited in Crocker, 110](#), 91). How much of this is true? It's hard to say. When the end came, all reports are that Olivia Sage sat patiently by her husband's side. Next time, we'll talk about what the reputations of Russell and Olivia Sage tell us about the norms around wealth and charity in their time.

FROM THE NSF

“NSF 2022 Research Security Training for the United States Research Community awardees announced”

“The U.S. National Science Foundation announced four awards under the [Research Security Training for the United States Research Community](#) program. The program is a cornerstone of the NSF mandate to strengthen research security in the U.S. while encouraging principled international collaboration. NSF has long worked in partnership with federal agencies that fund research to improve the development and implementation of research security. In addition to NSF, the research security training module series is also supported by funding from the National Institutes of Health, the Department of Energy, and the Department of Defense.

“Awardees will receive financial support to establish research security training frameworks that address U.S.-funded research and development security concerns, risks and threats. The four awardees will focus on developing training modules that detail research security insights and best practices, address the importance of disclosure, identify and remedy knowledge gaps in risk management and mitigation, and provide training on principled international collaboration.” [<<more>>](#)

“Update on Simplifying Review Criteria: A Request for Information”

By Mike Lauer. Posted December 8, 2022.

“NIH has issued a [request for information \(RFI\)](#) seeking feedback on revising and simplifying the peer review framework for research project grant

applications. The goal of this effort is to facilitate the mission of scientific peer review – identification of the strongest, highest-impact research. The proposed changes will allow peer reviewers to focus on scientific merit by evaluating 1) the scientific impact, research rigor, and feasibility of the proposed research without the distraction of administrative questions and 2) whether or not appropriate expertise and resources are available to conduct the research, thus mitigating the undue influence of the reputation of the institution or investigator.”

Data on Researchers’ Self-Reported Disability Status

By Mike Lauer. Posted December 13, 2022.

“The Centers for Disease Control and Prevention [reported in August 2022](#) that just over 1 in 4 adults in the United States have some type of disability. When focusing on data on the workforce, the National Science Foundation (NSF) [suggests](#) modest growth in the percentage of academic scientists with disabilities over the past two decades, going from 6 percent in 1999 to 9 percent in 2019. NSF data related to the future workforce also show that 9.1 percent of all graduates earning a doctoral degree in 2019 reported having a disability. These gaps between persons with disabilities engaged within the biomedical research workforce compared to the general population, together with our continued interest in strengthening the workforce, [contributed](#) to the creation of a [Subgroup of the Advisory Committee to the NIH Director \(ACD\)](#) last year to identify strategies that support individuals with disabilities in biomedicine.” [<<more>>](#)

U.S. Congress boosts spending on earmarks to universities

From *Science Magazine* by Jeffrey Mervis. Posted December 29, 2022.

“The \$1.7 trillion [spending package](#) that Congress passed on 23 December does more than fund the entire U.S. government in 2023. Senators and members of the House of Representatives from both parties also used it to funnel \$15 billion to 7200 projects in their districts that federal funding agencies never requested. The projects include new research facilities and academic programs at hundreds of public colleges and universities. That

spending signals the robust resurgence of earmarks, the sometimes controversial—and until recently banned—practice in which legislators use their constitutional authority over federal spending to benefit their constituents.” [<<more>>](#)

Universities Report Largest Growth in Federally Funded R&D Expenditures since FY 2011

From the *National Center for Science and Engineering Statistics*. Posted December 15, 2022.

“Research and development spending by academic institutions totaled \$89.9 billion in FY 2021, an increase of \$3.4 billion (4.0%) from FY 2020 ([table 1](#)). R&D expenditures funded from federal sources accounted for \$3.0 billion of the total increase. Federally funded R&D expenditures had not increased by \$3 billion or more since FY 2011, when the American Recovery and Reinvestment Act of 2009 supplemented the flow of R&D support dollars. University-funded R&D expenditures were 2.1% greater (\$459 million) than in FY 2020 due largely to several institutions' improved accounting of internally funded R&D through new financial systems and reorganizations. Universities reported \$149 million more in R&D expenditures funded from state and local governments, an increase of 3.2% from FY 2020. R&D expenditures funded by nonprofit organizations (-2.6%, -\$150 million) and businesses (-1.3%, -\$68 million) decreased, while R&D funded by all other sources was virtually flat (0.2%

"ArtsCONNECT supports touring projects collaboratively developed by presenters working together in the mid-Atlantic region. The tours include performances as well as complementary engagement activities designed to create greater understanding or connections between artists, audiences, and communities." [<<link>>](#)

National Endowment for the Arts Creative Writing Fellowships

Deadline: March 8, 2023

"The National Endowment for the Arts Literature Fellowships program offers \$25,000 grants in prose (fiction and creative nonfiction) and poetry to published creative writers that enable the recipients to set aside time for writing, research, travel, and general career advancement." [<<link>>](#)

Creative Capital Wild Futures

Deadline: March 31, 2023

"In celebration of our upcoming 25th Anniversary,

Creative Capital is pleased to announce "Wild Futures: Art, Culture, Impact"—the one-time theme for our next grant cycle in 2024. In the upcoming grant cycle, we invite artists to propose experimental, risk-taking projects in the visual arts and film/moving image, which push boundaries formally and thematically, and/or venture into wild, out-there, never-before-seen concepts and future universes real or imagined. Ultimately, we seek proposals for groundbreaking new work—including, but not limited to, work that attends to the many relationships between social, economic, and environmental justice, and advances the global dialogue around critical issues impacting the sustainability of artists, our communities, our planet, and beyond." SOCIAL SCIENCES

International Literacy Association (ILA) Jerry Johns Outstanding Teacher Educator in Reading

Deadline: March 15, 2023

"The International Literacy Association (ILA) Jerry Johns Outstanding Teacher Educator in Reading Award is a US\$1,000 award presented annually to honor an outstanding college or university teacher of reading methods or reading-related courses." [<<link>>](#)

Gerald R. Ford Presidential Foundation Gerald R. Ford Presidential Foundation Research Travel Grants Program

Deadline: March 15, 2023

"The Gerald R. Ford Presidential Foundation awards grants of up to \$2,200 each in support of research in the holdings of the Gerald R. Ford Library. A grant defrays travel and living expenses of a research trip to the Ford Library in Ann Arbor. Overseas applicants are welcome to apply, but they will be responsible for the costs of travel between their home country and North America. The grants only cover travel within North America. Library collections focus on Federal policies, U.S. foreign relations, and national politics in the 1960s and 1970s. There are earlier and later materials depending upon your topic." [<<link>>](#)

**Ploughshares Fund

"To be eligible, an applicant must be a graduate student or untenured faculty member conducting research on modern Chinese history or the archaeology of China at a university or college." [<<link>>](#)

**American Studies Association
John Hope Franklin Prize**

Deadline: March 1, 2023

"The John Hope Franklin Publication Prize is distributed yearly and honors the most outstanding book published in American studies for the year preceding the annual meeting. Recipients of the award receive \$1,000. The prize winner will be announced at the annual meeting of the American Studies Association." [<<link>>](#)

**OeAd
Franz Werfel grant**

Deadline: March 1, 2023

"Franz Werfel, born in Prague in 1890 and died in California in 1945, is one of the most important representatives of Austrian literature. The Franz Werfel scholarship is therefore aimed at young university lecturers who are primarily concerned with Austrian literature. The scholarship program, initiated in 1992, is open to applicants from all over the world. The Werfel scholarship holders can work as guest researchers at institutes and carry out special studies in libraries, archives or at research institutions. It is not just a grant in the sense of material support for up to 18 months, but sustainability is also guaranteed through the inclusion in aftercare." [<<link>>](#)

**American Psychological Foundation
Esther Katz Rosen Fund Grants**

Deadline: March 1, 2023

"The Esther Katz Rosen Fund was established in 1974 by a generous bequest intended to support "...activities related to the advancement and application of knowledge about gifted children." Rosen Fund grants:

- enable and enhance development of identified gifted and talented children and adolescents
- encourage promising psychologists to continue innovative research and programs in this area

Support will be provided for activities on the advancement and application of knowledge related to identified gifted and talented children and adolescents, such as:

- Research
- pilot projects
- research-based programs" [<<link>>](#)

**National Institute of Health
Time-Sensitive Obesity Policy and Program
Evaluation (R01 Clinical Trial Not Allowed)**

Deadline: March 9, 2023

"This Funding Opportunity Announcement (FOA) establishes an accelerated review/award process to support time-sensitive research to evaluate a new policy or program that is likely to influence obesity related behaviors (e.g., dietary intake, physical activity, sedentary behavior, and/or sleep) and/or weight outcomes in an effort to prevent or reduce obesity. This FOA is intended to support research where opportunities for empirical study are, by their very nature, only available through expedited review and funding. All applications submitted to this FOA must demonstrate that the evaluation of an obesity-related policy or program offers an uncommon and scientifically-compelling research opportunity that will only be available if the research is initiated with minimum delay. For these reasons, applications submitted to this time-sensitive FOA are not eligible for re-submission. It is intended that eligible applications selected for funding will be awarded within 4 months of the application due date; however, administrative requirements and other unforeseen circumstances may delay issuance dates beyond that timeline. **Sontag Foundation
Distinguished Scientist Award**

Deadline: March 15, 2023

"Since 2003, the Sontag Foundation has invested over \$55 million dollars to support the scientific careers of young investigators pursuing high-risk projects at a critical stage in their research. Interested applicants should carefully read the following information about the award and application process before applying." [<<link>>](#)

**HFSP Funding
Research Grants**

Deadline: March 31, 2023

"HFSP Research Grants support innovative basic research into fundamental biological problems with emphasis placed on novel and interdisciplinary approaches that involve scientific exchanges across national and disciplinary boundaries (see guidelines)... Research grants are provided for teams of scientists from different countries who wish to combine their expertise in innovative approaches to questions that could not be answered by individual laboratories. Preliminary results are not required and applicants are expected to develop new lines of research through the research collaboration." [<<link>>](#)
